

A how-to guide and general information to help you get the most out of this file.

How to Add Your Design ?

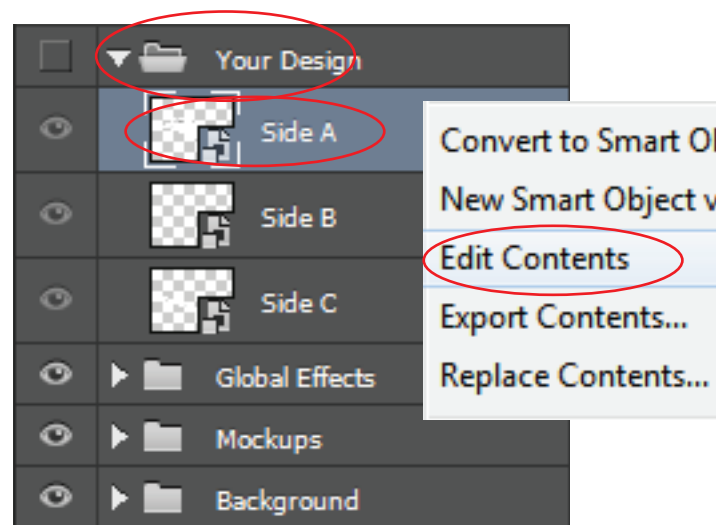

After your purchase & download this graphic, you will find 9 Photoshop .psd files which contain all your text mockups.

In each one of the Photoshop files, you will find the following layers.

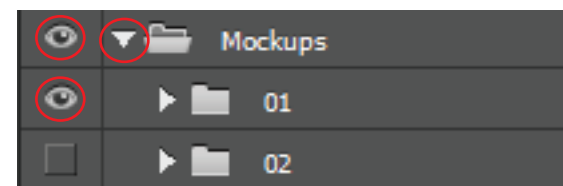

To add your design, go to the first group layer “Your Design” and expand its content by ticking the arrow next to it as shown in the screenshot.

Under this layer, you will find 3 layers that represent each of the 3 sides of the package box. Right click on a layer then click “edit contents”, a new window will open, paste your design in this window and save the file. Now go back to your main file, you will find that the design is updated. Repeat these steps for the other sides of your box.

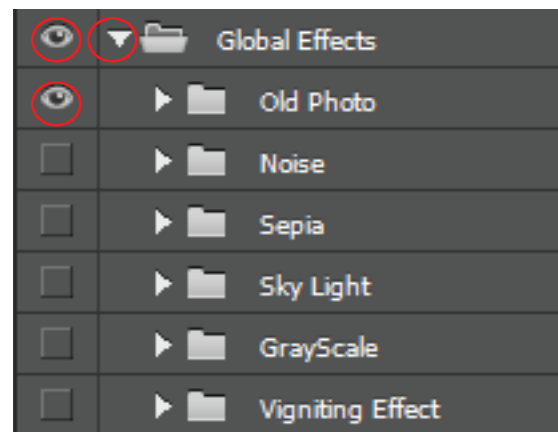

How to choose a mockup ?

Simply open the “Mockups” group layer. In this layer you will find a number of layers each represent one of the mockup templates. To choose one of the mockups, just enable the visibility its layer.

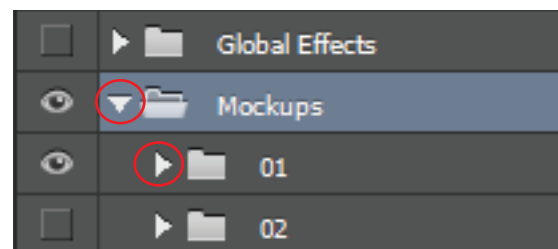

How to add global effects ?

To add a global effect, locate and expand the group layer “Global Effects”. Under this layer you will find a set of a number of effects. To choose an effect, simply make its layer visible by clicking the eye icon next to it.

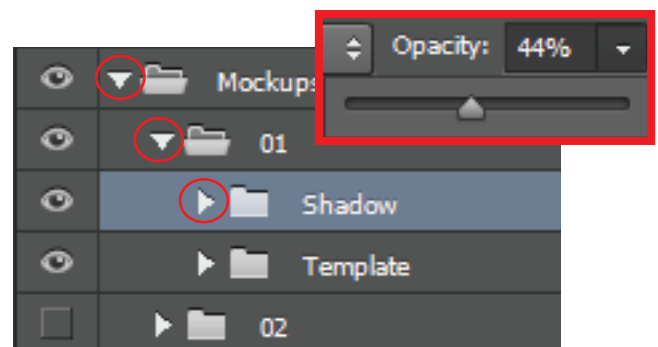

How to add other effects ?

When you expand the layer of each mockup, you will find to more effects that you can add or remove.

Shadows

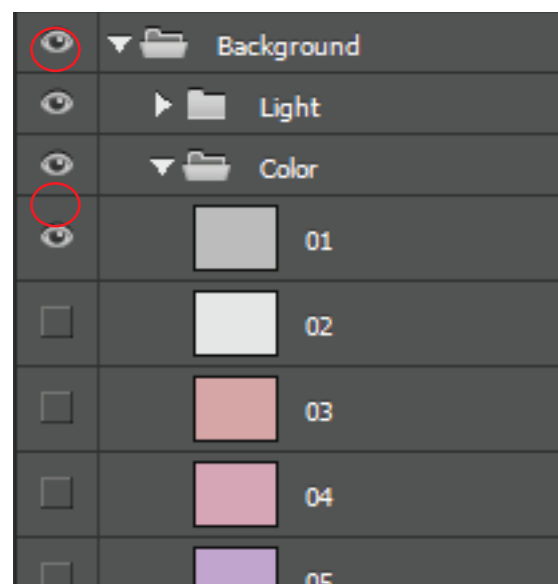

To increase or decrease the shadows intensity, go to the shadows layer and edit the layer opacity. Increase the opacity of the layer for darker shadows or decrease it for lighter shadows.

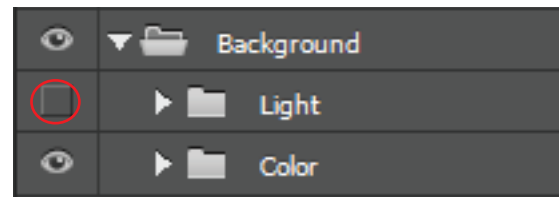

How to add Backgrounds?

Color Background

To add or choose a color background, go to “Background” group layer and expand it. Under this layer you will find two group layers; “Light” & “Colors” . Expand the “Color” Group Layer. A list of layers that of different colors will appear. Just click on the color you want to activate to make it appear on your mockup.

You can also create a new layer and choose another color out of the list or add an image, texture or pattern instead.

Add / Remove Lighting

To remove lighting from the background, just disable the visibility of the “Light” Layer.

thank you.
